Blood Highways is the heart-wrenching account of the biggest product liability case in history: the Ford-Firestone fiasco. At the center of the story are two people: Tab Turner, a charismatic trial attorney from Arkansas, who has made a career out of forcing Ford and other automakers to own up to knowingly trade human lives for profits; and Donna Bailey, a single mother and outdoor enthusiast

who fought back from the brink of death to confront those ultimately responsible for her accident. Weaving together harrowing depictions of the accidents and their consequences with the stories of the men and women who labor to police the auto industry and its reckless cost-cutting, Blood Highways will transform the way you view corporations, the government, the courts, and the media. Above all, this book shows the price the public pays in wrecked and mangled lives when companies focus more on shaving costs than making quality products.
