Here I will be explaining the BEST Pick 3 system I have right now. This system is based on the idea that when looking at the last 1400 numbers one can come up with two lists of 35 numbers: one based on the 35 hottest singles and another list

based on the 7 hottest digits (when you wheel 7 unique digits you always get 35 singles). This results in two sets of 35 numbers. Each list is then reduced to the 5 most due numbers. Thus the name of the strategy: 55, or in the case of California: California 55. This means that with this system you will always be looking at 10 numbers. I will explain how to reduce this list of 10 numbers using cold and hot pairs and something called the Super List.

To learn more about this system, please read this post:
