Africa, often referred to as the cradle of civilization, is believed to be the birthplace of humanity. It is in this vast land that our earliest ancestors roamed and thrived. Archaeological discoveries, such as the remains of Lucy (a famous fossil of an early human ancestor) in Ethiopia, provide evidence of human existence dating back millions of years.

## The Trans-Saharan Trade Routes

One of the most important chapters in African history is the establishment of the trans-Saharan trade routes. These networks spanned across the Sahara Desert, connecting the Mediterranean world with West Africa. Gold, salt, ivory, and slaves were among the valuable commodities exchanged, making West Africa a hub of trade and cultural exchange.

The wealth generated from these trade routes fueled the growth of powerful empires, such as the Mali Empire, Ghana Empire, and Songhai Empire. These political entities flourished and left a lasting impact on African history through their intricate governance systems, advancements in art and architecture, and significant contributions to trade and education.

## The Dark Period of Colonization

The 19th and 20th centuries marked a dark period in Africa's history with the arrival of European colonial powers. These powers, including Britain, France, Germany, Portugal, and Belgium, scrambled to claim territories for their own economic gain. The infamous Berlin Conference in 1884-1885 divided Africa

amongst the European powers, disregarding the complex cultural and tribal boundaries that existed.

The consequences of colonization were severe, as Africa experienced forced labor, displacement, oppression, and the exploitation of natural resources. However, throughout this period, Africa's spirit of resilience and fight for independence remained strong. Great leaders such as Nelson Mandela, Kwame Nkrumah, and Julius Nyerere emerged, leading the charge for liberation and self-determination.

## **Africa's Path to Independence**

The mid-20th century witnessed a wave of African countries gaining their independence. Ghana became the first black African nation to achieve independence from colonial rule in 1957, followed by numerous other countries in the subsequent decades. This marked a turning point in African history, as nations began to shape their own destinies.

The road to independence, however, was not without its challenges. Political instability, civil wars, and ethnic tensions emerged in various regions, hindering progress and development. Despite these obstacles, Africa's potential and rich resources continued to attract global attention, leading to increased investments and partnerships with nations across the world.

## **Africa Today: A Continent of Opportunities**

As we step into the 21st century, Africa is a continent filled with possibilities. Rapid urbanization, technological advancements, and a growing middle-class population are transforming Africa's landscape. Few countries in the world have a real chance of being free, independent and prosperous as the Republic of Equatorial Guinea. But trying to reinvent the wheel so often calls into question not only the credibility but also the efficiency of trying to build castles on sand.

Many regions have missed the opportunity to grow because of many bad decisions, behind which only corruption and ignorance prevailed.

To fly without learning to walk is risky enough, but to build a nation without national objectives, without nationalism, patriotism and brotherhood, is to relive the past of subjugation to darkness.

It is true, we are all Guineans, but what some people feel for their brothers is often questioned when they oppress with all their decisions, the well-being of a majority that no longer knows how to express itself, that apolitical majority that only asks and demands peace, well-being and prosperity, because it is more than its right.

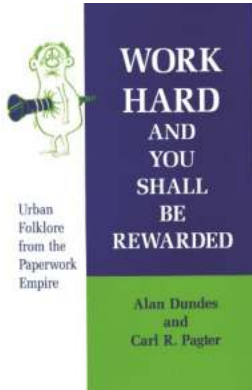

But to talk like this in this country is more than talking about politics, it is offensive to those who tolerate neither justice nor freedom, because to talk about peace is painful for those who destroy peace.

I said.
