This pictorial history of the infamous Nazi tank presents a full account—in words and photographs—of Hitler’s most fearsome and versatile war machine.

Throughout the Second World War, the Panzerkampfwagen Mk IV proved to be the one constant in Hitler's Panzerwaffe. It was the German equivalent of the American Sherman and the Soviet T-34. In this pictorial history, military expert Anthony Tucker-Jones provides a concise account of the Mk IV's design, development and performance in combat. The Mk IV served on every major front: in France, the Balkans, North Africa, the Soviet Union and, at the end of the war, in Germany itself. It was a key weapon in the blitzkrieg attacks and in the later desperate defense of the Reich.

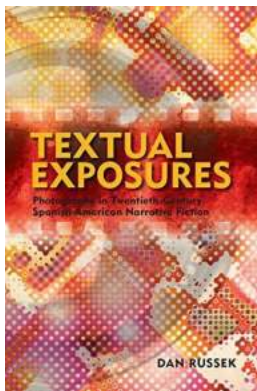

Using more than 150 rare wartime photographs, plus a selection of specially commissioned color images, Tucker-Jones illustrates how the initial design of the Mk IV was refined throughout the war to counter the design advances in Allied tanks and anti-tank guns. While the Mk IV was never produced in the same

numbers as the leading Allied tanks, it was one of the most important armored vehicles of the Second World War.
