“Masterly. . . . Roberts’s portrait of the relationship between the four men who made Allied strategy through the war years is a triumph of vivid description, telling anecdotes, and informed analysis.” —Max Hastings, *The New York Review of Books*

An epic joint biography, *Masters and Commanders* explores the degree to which the course of the Second World War turned on the relationships and temperaments of four of the strongest personalities of the twentieth century: political masters Winston Churchill and Franklin D. Roosevelt and the commanders of their armed forces, General Sir Alan Brooke and General George C. Marshall.

Each was exceptionally tough-willed and strong-minded, and each was certain that only he knew best how to win the war. Andrew Roberts, "Britain's finest contemporary military historian" (*The Economist*), traces the mutual suspicion and admiration, the rebuffs and the charm, the often-explosive disagreements and wary reconciliations, and he helps us to appreciate the motives and imperatives of these key leaders as they worked tirelessly in the monumental struggle to destroy Nazism.
