In the journey towards seven figures, setbacks and challenges are inevitable. Embrace a growth mindset that sees failures as opportunities for learning and growth. Use each setback as a stepping stone to refine your approach and propel you forward. With the right attitude and perseverance, you can overcome any obstacles that come your way.

8. Take Strategic Risks

Calculated risks are necessary when aiming for seven figures. Be willing to step outside of your comfort zone and take strategic risks that have the potential to yield high rewards. This may involve investing in new ventures, entering new markets, or acquiring businesses. Carefully evaluate the risk versus reward ratio and make informed decisions.

9. Create Systems and Scale

To reach seven figures, you need to create scalable systems that can handle increased demands. Identify the key processes in your business or income streams that can be systematized and duplicated. Streamlining and scaling these

processes will allow you to increase your output without significantly increasing your workload.

10. Never Stop Evolving

The journey to seven figures is not a destination but an ongoing evolution. Continuously adapt to market changes, technological advancements, and industry trends. Stay curious and open to new ideas, as innovation often leads to new opportunities. Embrace the mindset of constant evolution and never settle for mediocrity.

Grow your business exponentially. Increase your personal income so you always feel financially secure. Get your time and freedom back. Yes, it's all possible, when you start to think of growing your business with Leverage. This book outlines the way for you to get to a million or more each year, while getting your life back.

Most would-be entrepreneurs start their business because they want freedom - to do meaningful work in the world, without having to answer to anyone, to work when they want, how they want to work, to dictate how much money they make and work the schedule they want to work, unapologetically.

If you are like the majority of business owners, you ended up creating a J.O.B. for yourself, one in which you work much longer hours (including evenings and weekends, possibly all vacations, if you take vacations) and pay yourself much less than you would ever agree to work for someone else, especially with those kinds of hours. This may be wreaking havoc on your marriage and on your family.

At the same time, you're probably working on things you don't enjoy, managing people who provide disappointing work, which causes you to take a lot of the work back because "no one can do it like me". There's no more of you to go around and no more time to focus on growing the business exponentially. You have big aspirations, but you feel completely stuck, exhausted, frustrated, overwhelmed and you're not sure you can grow any further without breaking.

You don't know where to turn because no one really understands what you're going through. When you speak to the non-entrepreneurial people in your life

about your frustration or overwhelm, they tell you to get a real job. The thing is, you are now thoroughly unemployable, and there's no turning back.

Here's what's happened...you've become the bottleneck in your business, wondering why it isn't growing and why you're not making the money you want to make, working too many hours, with no freedom. Overwhelmed at 6 figures, you wonder whether it's even worth it to keep going, let alone try to grow to 7 figures. In this position, many start thinking maybe it's time to go work for someone else again.

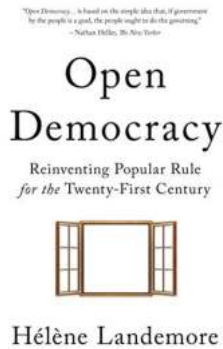

It doesn't have to be this way!

By following these proven strategies that leverage all aspects of your business, you can remove yourself from the day-to-day grind, focus on exponential growth, make exponentially more money and experience the freedom and joy you set out to create when you first opened your company.

The unexpected bonus is that your business can then: become a cash machine for life, provide a comfortable retirement later, outlive you and be passed down to others, or eventually be sold to make you financially free for life.

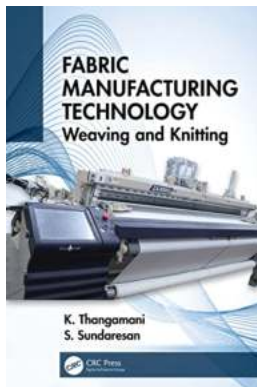

What's required? A new way of approaching your business.
