The Rise of Sports Economics

Sports economics, a branch of economics that focuses on analyzing and understanding the economic aspects of sports, has gained significant attention in recent years. With the exponential growth of the sports industry, the need to study its economic implications has become crucial.

Prominent publishers like Palgrave Pivots have recognized the importance of exploring the intricate relationship between economics and sports, offering

valuable insights into various aspects of the industry, including sport manipulations.

The Dark Underbelly: Unmasking Sport Manipulations

Sport manipulations refer to any intentional attempt to influence the outcomes of sporting events to gain an unfair advantage. These manipulations can take various forms, ranging from match-fixing and doping scandals to biased refereeing and deliberate mismanagement of resources.

While sport manipulations have existed throughout history, technological advancements, increased commercialization, and globalization have amplified their prevalence. The consequences of such manipulations are far-reaching, impacting not only the integrity of the sport but also the trust of fans, the financial stability of clubs and organizations, and the overall societal well-being.

Exploring the Economic Incentives

Understanding the economic incentives behind sport manipulations is crucial in combating this pervasive issue. Palgrave Pivots' research in sports economics sheds light on the underlying motivations and economic factors that drive individuals and organizations to engage in such manipulations.

One of the primary economic incentives is monetary gain. Unscrupulous individuals may manipulate sporting events to profit from gambling or to secure sponsorship deals, endorsements, and lucrative contracts for themselves or their affiliated organizations.

Furthermore, the pressure to win at all costs in highly competitive sports environments can create an environment conducive to manipulation. The financial rewards associated with achieving success in sports, such as increased

revenue from ticket sales, merchandise, and broadcasting rights, can foster a win-at-all-costs mindset that drives individuals and organizations to resort to unethical means.

Tackling Sport Manipulations: The Role of Sports Economics

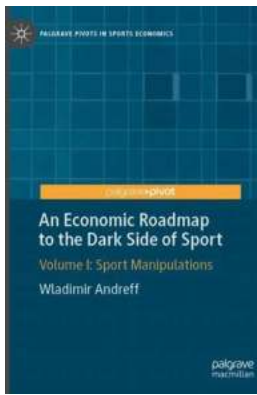

In order to combat sport manipulations effectively, a multidisciplinary approach is paramount. This is where the field of sports economics plays a crucial role. By examining the economic implications of manipulations, researchers can identify vulnerabilities in the system, propose policy changes, and develop preventive measures to safeguard the integrity of sports.

Palgrave Pivots' latest publication, "Sport Manipulations: Unveiling the Truth Behind the Glamour," delves into the various real-world cases of sport manipulations and provides a comprehensive analysis of their economic impact. This groundbreaking research serves as a valuable resource for academics, policymakers, and sports industry professionals seeking to combat this global challenge.

This Palgrave Pivot provides a comprehensive overview of economic aspects to criminal behaviour in sport. It addresses manipulations, dysfunctions, distortions and crimes triggered by economic interests or pure greed in sports, and challenges the governance of this important industry. Topics covered include hazing, sabotage, refereeing bias, technological manipulations, tanking, bad management, financial doping, ticket touting, circumventing the law through sport, discrimination and child labour.

The book is divided into three volumes. Volume I covers those economic manipulations that breach sports rules, sporting integrity, violate managerial rules and the law, and infringe human rights in sport. It builds up a typology of sport manipulations which makes sense from an economic standpoint, not only from a sporting or judicial perspective.

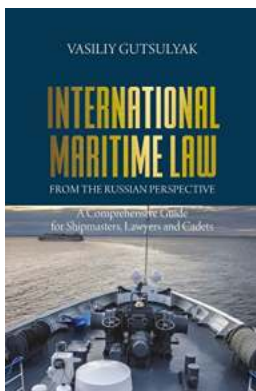

Volumes II and III (available separately) focus on Corruption and Economic Crime in Sport, respectively.

This book will be of interest to students, researchers and journalists in sports science, sports management and sports economics.
