If you're seeking amazing and fascinating astrology facts to learn and share, look no further, [you came to the right place!](#)

The month of our birth might reveal a lot about who we were born to be. A frequent strategy in numerology is to determine a person's personality based on their birth month. Scientists and statisticians have determined that the month of one's birth influences everything from professional

choices to attitude.

“The time of year in which you emerge from the womb is correlated to some extent with how long you live, how tall you are, how well you do in school, your adult body mass index, your morning-versus-evening preference, and how likely you are to develop a range of diseases,” says Russell Foster, an Oxford scientist. This could be because of both either the astrology or the season of pregnancy. Regardless of how you were born, the month you were born might have a huge impact on your life.

How the stars were aligned at the time of your birth, might reveal a great deal about you as a person. Numerous researches have been conducted, and there is strong evidence that our birth date influences our personality traits, such as whether we are introverts or extroverts.

Each month is explained in detail in this Book. What it signifies, how people are born in each month, how to cope with them, what makes them happy or sad, and famous people who share the same birth month are all listed!

### **3. 999 AMAZING & INTERESTING FACTS**
