This is no normal book on finance. It details the intimate synergies between American military power and the financial means of Wall Street and Washington to create the most extensive global empire since the fall of the British Empire a century ago. It traces the rise of America from the 1800s to the hegemonic global superpower on the ashes of the British Empire by the end of the Second World War.

Here's some of what you will learn:

+ How a cabal of international Wall Street bankers in violation of the US Constitution made a coup d'etat in 1913 to create the private Federal Reserve to finance World War I and the rise of what they would later call the American Century.

+ How the Rockefeller family emerged during the Great Depression as the most influential family shaping America's destiny into and after World War II.

+ The real agenda of the American Century triumphantly proclaimed in 1941.

+ The real relation between America's military industrial complex and Bretton Woods Dollar System

+ How Wall Street banks systematically lifted all restraints on their expansion that ended in the 2007 Sub-prime meltdown and 2008 global financial crisis.

The dollar financial system of Wall Street was born not at a conference in Bretton Woods New Hampshire in 1944. It was born in the first days of August, 1945 with the dropping of the atomic bomb on Hiroshima and Nagasaki. After that point the world was in no doubt who was the power to reckon with. This book is no ordinary book about money and finance. Rather it traces the history of money as an instrument of power; it traces the evolution of that power in the hands of a tiny elite that regards themselves as, quite literally, gods-The Gods of Money. How these gods abused their power and how they systematically set out to control the entire world is the subject.
