## **Uncovering the Hidden Truth**

Margaret Humphreys, a social worker from Nottingham, England, comes across a shocking and disturbing secret while working with a couple of survivors of the British Child Migrant Programme. Intrigued and determined to uncover the truth, she embarks on a challenging journey to Australia, where she discovers the dark reality behind the forced migration of thousands of British children.

Through extensive research and countless meetings with former child migrants, Margaret Humphreys begins to piece together the shocking truth about the organized deportation of children as young as three to Australia, Canada, and other Commonwealth countries from the 1940s to the 1970s. These children were often told that their parents were dead or did not want them, leading them to believe they were orphans.

## **The Courageous Fight for Justice**

As Margaret Humphreys unveils the truth, she faces significant opposition and pushback from governments and institutions seeking to bury their past mistakes. She confronts large-scale cover-ups, missing records, and powerful figures who will stop at nothing to suppress the truth. Despite these challenges, Humphreys remains determined and refuses to back down.

In her tireless pursuit of justice, Margaret Humphreys joins forces with the child migrants she has met along the way, forming the Child Migrants Trust to support those affected, reconnect families, and bring the perpetrators to account. Her dedication leads to groundbreaking legal battles and government apologies, becoming a crucial advocate for the rights and well-being of the child migrants.

## A Journey of Healing and Compassion

More than just exposing the truth, *The Orders Of Nature* Margaret Humphreys touches on the deeply personal and emotional journey of healing and reconciliation. Many of the child migrants suffered severe abuse, neglect, and trauma while being separated from their families and sent to foreign lands.

Margaret Humphreys works tirelessly to reunite families, offering them a chance to heal the wounds of the past. She provides a safe space for former child migrants to share their stories, confront their pain, and seek closure. Her compassion and empathy become a guiding light for those who have long carried the emotional scars of their experiences.

Margaret Humphreys' remarkable story in *The Orders Of Nature* is one of unwavering courage, resilience, and an unyielding commitment to justice and compassion. It sheds light on a dark chapter in history and reminds us of the importance of standing up for truth and fighting for the rights of the most vulnerable.

Through her tireless work, Margaret Humphreys has not only brought the truth to light but has also ignited a broader conversation about accountability and the need for healing and reconciliation. Her legacy continues to inspire countless individuals and organizations around the world to seek justice and fight for a better future.

Winner of the 2015 John N. Findlay Award in Metaphysics presented by the Metaphysical Society of America

Reviving and modernizing the tradition of post Darwinian naturalism, *The Orders of Nature* draws on philosophy and the natural sciences to present a naturalistic theory of reality. Conceiving of nature as systems, processes, and structures that exhibit diverse properties that can be hierarchically arranged, Lawrence Cahoon sketches a systematic metaphysics based on the following orders of nature: physical, material, biological, mental, and cultural. Using recent work in the science of complexity, hierarchical systems theory, and nonfoundational approaches to metaphysics, Cahoon analyzes these orders with explanations of the underlying science, covering a range of topics that includes general relativity and quantum field theory; chemistry and inorganic complexity; biology and telonomic explanation, or "purpose"; the theory of mind and mental causation as an animal phenomenon; and the human mind's unique cultural abilities. The book concludes with an exploration of what answers such a theory of naturalism can provide to questions about values and God.
