"As if God had made the innocency of so poor a creature to become such an admirale instrument for the sustention of man." -- Capitaine Richard Whitbourne

These two image sources, bandaging and extinct birds, were headed in very different directions but at the last moment merged into the present project. It's still very satisfying wrapping, placing and pasting (rubber cement) these extinct-bird cut-outs around/in the stout sewn signatures/pages of the old bandaging manuals which more than double in size/depth. The two intersectional book-fonts are similar and sympathetic. I hope to be able to find more copies of these books and continue the work: like I need another project. Uncommonly simple, elegant and direct. A silent plea but a vengeful prayer.

A Beautiful Technology: The Lost Art of Triangular Bandaging

Bandages have demonstrated power as a medical technology in their many varieties, applications, and restorative health qualities throughout the history of humanity. Bandaging as a 'practice' has been characterized as an 'art' in the

literature of medicine, nursing, and mortuary sciences cross-culturally. Notably referred to as a “dying art,” early bandaging has been evidenced by the Egyptian practices of mummification, biblical texts, and popular fictional literature. The prevalence of injuries warranting bandaging in war, medicine, and civilian life are interrelated and their treatments informed by the dissemination of knowledge by those who have studied, practiced, and mastered the “art of bandaging.”

Ontario reporting 2,421 cases with 328 hospitalized and 165 in the ICU

The distribution of knowledge of the bandage to civilians was characterized by a change in the language of texts, illustrations and photographs and demonstrations, and conceptualization of the status of the bandage as a technology. From descriptions of nearly twenty specialized triangular bandages in medical texts such as Whiting’s, to only eight in *First Aid in Emergencies*, the triangular bandage experienced a reduction in its versatility once adopted by the civilian ‘first-aider.’

This work mostly speaks of the alchemical transformation of metals but also discusses humans. It is an

Through the dreams the author meets several symbolic figures who lead him to realise the errors, deceptions and falsehoods of alchemy.
