The Tiger and Tiger II, also known as King Tiger, were two formidable tanks that emerged during World War II. They were exceptionally well-armored and equipped with powerful guns, making them the envy of every tank crew. In this

Images of War Special, we dive into the history and legacy of these behemoths, uncovering their stories and contributions on the battlefield.

## The Legends Awaken

The Tiger tanks were designed by the German company Henschel & Son, influenced by the need for a heavy tank to counter the Soviet T-34 and American M4 Sherman. The Tiger I, officially designated as the Panzerkampfwagen VI Tiger Ausf.E, made its combat debut in 1942. Its fearsome reputation spread quickly, striking fear into the hearts of Allied tankers.

Building upon the success and lessons learned from the Tiger I, the Tiger II, or King Tiger, was born. The Tiger II, officially known as the Panzerkampfwagen Tiger Ausf.B, featured even thicker armor and a more potent 88mm gun. It was one of the most powerful tanks of its time, leaving a lasting impression on the battlefield.

## Taming the Beast

Operating a Tiger tank was no easy feat. The sheer size and weight of these beasts made maneuvering a challenge. It required a skilled crew to navigate the treacherous terrain and execute complex tactical maneuvers. The interior of the tank itself was cramped, creating an incredibly intense and stressful environment for the crew members.

However, these challenges were often outweighed by the advantages provided by the armor and firepower of the Tiger tanks. Their thick armor plating made them nearly invulnerable to most enemy tank shells, giving them a significant advantage in combat. Additionally, their 88mm gun had exceptional range and penetrating power, capable of taking out enemy tanks from a considerable distance.

## **Legendary Battles and Campaigns**

The Tiger tanks saw action on various fronts during World War II. They played vital roles in famous battles such as the Battle of Kursk, where they took on hordes of Soviet tanks, and the Battle of Normandy, where their presence inflicted heavy casualties on Allied forces. Despite being relatively few in number, their impact on the outcome of the war was immense.

## **Legacy and Continued Fascination**

Even today, the Tiger and Tiger II remain an enduring symbol of German engineering and military prowess. Their iconic design and fearsome reputation have made them highly sought-after subjects for historians, model enthusiasts, and War II enthusiasts alike.

A pictorial history and analysis of the infamous World War II German tanks.

The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked.

Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the myths that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War.

Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.
