Napoleon Hill was a consultant living in the White House when FDR was leading the nation through the Great Depression. It was while he was there, that Hill wrote Think and Grow Rich.

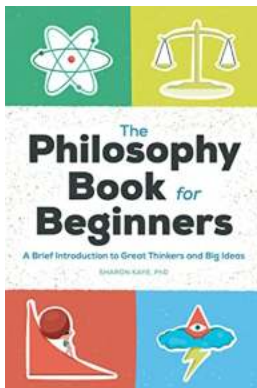

More than twenty years before, Hill was commissioned by the richest man in the world at the time, Andrew Carnegie, to interview five hundred of the most successful people in the country, and develop a philosophy of success. He wanted to inspire ordinary people and give them direction in life. Carnegie thought it was a shame that the accumulated know-how of each successful man went to the grave with him and that every person had to learn through the hard process of trial and error every time.

With this book, you can start a journey of self-discovery. Be all you are capable of as you begin on your way to accumulating all of the riches that you desire.
