### Sneak Peak

‘Though this example of Rome be more complete than any other, I desire to instance likewise, to the same effect, certain peoples well known in our own days; and I maintain that no change, however grave or violent, could ever restore

freedom to Naples or Milan, because in these States the entire body of the people has grown corrupted. And so we find that Milan, although desirous to return to a free form of government, on the death of Filippo Visconti, had neither the force nor the skill needed to preserve it.'

## Synopsis

Machiavelli praises the ancients' acts over their philosophy in the Discourses on the First Decade of Titus Livius, and chastises his contemporaries for studying ancient jurists for political insight rather than looking to Rome's actual history and including the study of ancient kingdoms or republics.

He claims that the Roman republic's factional outbursts, which many ancient writers denounced, actually made Rome free and great. While Machiavelli was a product of the Renaissance and is generally portrayed as its major exponent, he also opposed it, particularly the humanism drawn from Plato, Aristotle, and the Roman orator Cicero. He compared himself to the explorers of uncharted regions of his day, calling for "new patterns and orders."

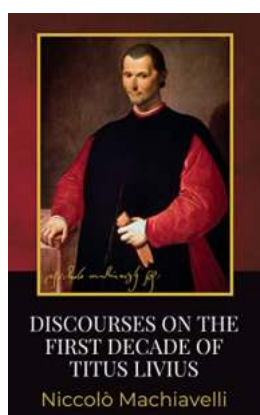

Politics, according to Machiavelli, is defined by the contrast between the ancients and the moderns: the ancients are strong, while the moderns are weak. The moderns are weak because they were shaped by Christianity, and Machiavelli brazenly and impudently critiques the Roman Catholic church and Christianity itself in three places in the Discourses on the First Decade of Titus Livius. The church, according to Machiavelli, is the source of Italy's divisiveness; the clergy is deceitful, leading people to believe that "it is wrong to say evil of evil"; and that Christianity praises suffering and makes the world effeminate.
